

NEW Superior Lightweight Solar Panels

Integrated Mounting Brackets

A lightweight, high-performance solar panel designed with a thin, non-glass build and integrated mounting brackets for quick, secure installation. A-Grade Monocrystalline PERC cells deliver excellent efficiency, supported by an aluminium frame for strength and a tidy finish.

The patented low-conductivity backplate helps maintain optimal temperatures for long-term performance. Perfect for motorhomes, campervans, boats, and off-grid setups where weight, height, and aerodynamics matter, all backed by a 10-year warranty.

Why use a Lightweight panel?

Far Lighter

| Easier to lift, handle, and mount than heavy glass panels.

Runs Cooler

| Low conductivity backplate keeps cells cooler for better sustained efficiency.

Faster Installation

| Integrated mounting brackets mean quicker, cleaner fitting.

More Durable on the Move

| No glass to crack from vibration, flex, or impact.

Sleek, Low Profile Design

| Sits closer to the surface for better aerodynamics and a cleaner look.

Reliable Warranty Coverage

| 20-year* cell warranty and 10-year** product warranty for peace of mind.

WATT	DIMENSIONS	WEIGHT
170W	807 x 1315 x 12mm	5.2Kg
250W	807 x 1770 x 12mm	7.6Kg

*The 20-year cell warranty is based on the cells producing over 80% of the original power in year 20.

**The 10-year product warranty is for any manufacturing defects. Any accidental damage etc is not covered.

Lightweight Panel Kits

Our lightweight solar panel kits are designed for fast, tidy, and reliable installation. Each kit pairs our new lightweight panel with all the essential components you need to get up and running quickly, whether you're fitting out a motorhome, campervan, boat, or off-grid system. Choose between the Victron controller or one of our new SolarGo2 controllers with wireless control and a built-in display.

What's included in your kit?

- **Solar Panel** Choose the size that best fits your power needs or size available on your roof.
- **Solar Charge Controller** Victron or SolarGo2 MPPT options, pre-sized to your kit or matched to your chosen requirements.
- **Cable Gland** Securely route cables for a clean, professional finish.
- **Inline Fuse and Holder** Keeping your solar system, and you, safe.
- **Bonding Agent** Ensuring a strong and lasting attachment.
- **Alcohol Wipe** Prepares surfaces for secure mounting.
- **Downloadable Instructions** Step-by-step guidance for easy DIY setup.
