

Premium Semi-Flexible Solar Panels

Built for Endurance

Our semi-flexible solar panels deliver exceptional durability and performance in any environment. With their sleek black finish they are designed to withstand salt spray, extreme weather, and physical stress. These panels ensure long-term reliability for your off-grid energy needs.

Featuring high-efficiency monocrystalline cells, these panels provide superior power output compared to cheaper alternatives. Constructed using advanced polymer composites and ETFE materials, they are ultra-thin, lightweight, and highly resistant to impact, corrosion, and UV radiation, guaranteeing long-lasting performance wherever you go.

Why Choose Our Semi-Flexible Panels?

A-Grade Monocrystalline PERC Solar Cells

Multi-bus bar technology enhances efficiency, reduces stress, and minimizes degradation over time.

High-Transmission ETFE Top Surface

Maximizes solar absorption while providing long-term protection.

UV-Stabilized 5m Cable

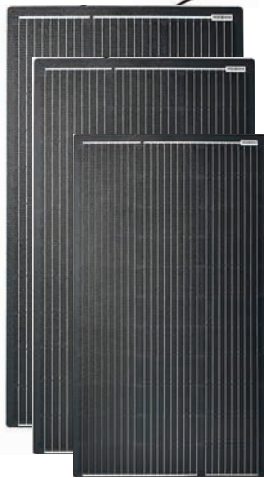

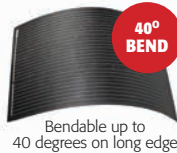

Ensuring long-term durability in outdoor conditions.

Weather-Resistant Build

Perfect for mounting on caravans, campers, boats, and off-grid projects.

Reliable Warranty Coverage

3-year product warranty for peace of mind.

WATT	DIMENSIONS	WEIGHT
100W	990 x 540 x 3mm	2.1Kg
200W	1410 x 710 x 3mm	3.9Kg
250W	765 x 1740 x 3mm	4.7Kg

Semi-Flexible Solar Panel Kits – The Complete DIY Solution

Our semi-flexible solar panel kits are designed for versatility and lightweight convenience, using high-efficiency panels to deliver reliable performance. Perfect for curved surfaces such as boat decks, camper roofs, or caravans, these lightweight kits include everything you need for installation. You can choose between the industry leading Victron solar controller or one of our new SolarGo2 controllers with wireless control and a built-in display.

What's included in your kit?

- **Solar Panel** Choose the panel size that best matches your power needs or the space available on your roof.
- **Solar Charge Controller** Victron or SolarGo2 MPPT options, pre-sized to your kit or matched to your chosen requirements.
- **Inline Fuse and Holder** Keeping your solar system, and you, safe.
- **Bonding Agent** Ensuring a strong and lasting attachment.
- **Downloadable Instructions** Step-by-step guidance for easy DIY setup.
